

Quality Policy of Pannon Tools Kft.

The objective of Pannon Tools Kft. is to continuously supply its customers in the field of tool and component manufacturing with high-quality products that comply with specified requirements and expectations, while maintaining a low environmental impact. Through this, the company aims to ensure its strong market position and further strengthen its competitiveness.

The focus of Pannon Tools Kft.'s activities is the continuous pursuit of customer satisfaction.

Pannon Tools Kft. intends to achieve its objectives through professionally competent employees, well-organized operations, stable technical and technological background, and a conscious mindset committed to the quality management system.

In order to achieve our objectives:

- The management of Pannon Tools Kft. annually defines quality and environmental management programs / quality and environmental objectives, including assigned responsibilities and deadlines. The management continuously monitors, analyzes, and evaluates the achievement of these objectives.
- All employees of Pannon Tools Kft. perform their work to the best of their knowledge and abilities, are committed to quality within their respective areas of responsibility, and are accountable for the quality of their work.
- Customer needs and expectations are continuously monitored, reviewed, and analyzed, and based on these, we ensure that our customers receive the best possible products.
- To achieve our objectives, we operate a certified quality management system in accordance with ISO 9001 and IATF 16949 standards, and continuously ensure compliance with customer-specific requirements.
- We continuously improve the quality management system and the effectiveness of our processes, and support process owners and contributors with appropriate tools.
- We employ qualified personnel in accordance with requirements and continuously develop their professional competencies through training.
- We establish and maintain mutually beneficial relationships with our suppliers and subcontractors.
